About Me

I am a dependable, hard working, goal oriented, and determined person. When placed in a role in any environment I strive to make the biggest impact I can. To ensure myself above competency I strive to consume information daily and focus on contributing to the team in the most efficient way. As an extremely self-disciplined full stack developer I am looking for a position where I have the ability to grow and excel in development. I am open minded and always look to figure out the most efficient way to get the job done. I work well with others and work well on my own.

Skills

Languages & Frameworks: JavaScript ES6 / ES7, React & Redux, React Native, Express, Node.js, MongoDB / Mongoose, jQuery, HTML/CSS(SCSS) Python, Wordpress, Firebase, Quickbooks, SQL

Features: Stripe, Webpac Module Bundler, Babel, ElasticSearch

Website Design: Experienced in website development from consultation to deployment.

Development Best Practices: Disciplined usage of Git to properly organize project workflow.

Management:

- Lead development roles.
- Management experience of over 20 people at a time.
- Numerous customer service interactions throughout career with public and private service.

Other:

- Extensive knowledge of Excel including harvesting data, creating tables, charts, and interactive Excel Dashboards.
- Firm grasp on programs such as Photoshop and text editors.

Experience

Thrive360

April 2021 - Current

Lead Frontend Developer

Lead the frontend development out of startup phase.

My achievements include:

- Overhauled site map and created a more efficient navigation system
- Established and created company policies to ensure an efficient development pipeline
- Built company structure for bringing in new developers. Lead team of 5-10 developers build company product

Viridian TransVision

March 2020 - March 2021

Javascript React Front End Engineer

Front end position utilization advanced levels of react skills to maintain and upgrade continuously a web dashboard customization tool that is used by private logistics companies around the US. This job includes meeting daily for "SCRUM", working from home option as well as working in an office setting.

Close communication with all team members using Slack.

My achievements include:

- Completing daily development tasks and increasing overall production.
- Developed an algorithm that filtered assignable items based on their availability and specification.
- Expanded user view with multiple information pages that had various features
- Establish strong bond between backend developers and front end developers with endpoints/features being able to quickly be put to production.
- Started in house continuing education to build testing environment.

Powered Labs

May 2019 - March 2020

ReactJS, Redux, Semantic UI, Google Firebase, Quickbooks API, Elasticsearch

****Working as a remote contract React developer. Occasionally driving from Austin to Houston for in person meetings and brainstorming sessions. Working 10hr days from home or various other locations.**

****Developing final touches and features to smooth out app that's been in production for 8 months prior to my arrival.**

My achievements include:

- Reworking the UI to be more presentable
- Developing an algorithm to filter users for state licenses whitelist/blacklisting.
- Adding edit features on user profiles to be able to quick add state licenses, whitelist and black list clients, and change collector types.
- Added a feature to be able to upload an excel document into the app to quickly fill clients, debtors, and placements in seconds.
- Setup Staging Server.
- Pulled data from old software on a remote desktop server and exported it into an xls from SQL Management Studio. Then use that xls to upload old data into the new software.

Austin Devs LLC

April 2018 - April 2019
